-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This Office Action is in response to the Applicant amendment filed March 10, 04.

Claims 25 and 26 have been amended.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claim 25 is rejected under 35 U.S.C. 102(a) as being anticipated by Bone et al. (US Patent No. 6,694,631).

Art Unit: 2636

Claim 25:

Bone et al. discloses a power tool comprising :

- a. A housing (the tool)
- b. A motor within the tool (inherent since the tool in Bone is a power tool)
- c. An output coupled with the motor (drill)
- d. An activation member (inherent) for energizing the motor for rotating the output
- e. A power source (inherent) electrically coupled with the motor and the activation member
- f. A leveling mechanism 10 comprising an LED 34 coupled with the power tool housing and the power source, the leveling mechanism 10 positioned inside the power tool housing near the motor (it appears that the rectangular box in the front figure drawing is the motor) such that the power tool housing surrounds the leveling mechanism, the leveling mechanism including a rotating member which seeks equilibrium position which corresponds to a horizontal or vertical plane, and the light emitting device projecting from the housing at a desired position on the power tool housing so that the light emitting device illuminates, in response to the rotating member equilibrium position, to indicate to a user that the power tool is in a horizontal or vertical position.

5. Claims 26-37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2636
